3. End-to-End Application Workflow	8
4. Technology Stack	10
5. Project Fee Structure	11

1. Platform Overview

The proposed platform will allow Muslim men and women to create marriage profiles for the purpose of finding suitable marriage prospects in a controlled, respectful, and Shariah-conscious environment.

The platform will be connected with participating mosques, which will act as trusted mediators between interested parties. Users will not directly contact each other. Instead, when a male user is interested in a female profile, he will submit an interest request through the platform. The relevant mosque or mediator will then facilitate the next steps.

The objective is to create a safe, private, and community-led matchmaking platform where mosques play an active role in supporting marriage introductions.

2. Scope of Work

Category	Item	Details
User Roles	Male User	Register, create profile, browse permitted profiles, initiate or receive interest requests directly with other users, limited to one active match at a time
	Female User	Register, create profile, manage privacy settings, initiate or receive interest requests directly with other users, limited to one active match at a time
	Mosque / Masjid Admin	Notified of all interest requests and matches linked to the mosque, verifies mosque affiliation for users linked to their mosque, monitors conduct, can be escalated to by either party, cannot reject or block a request between two consenting users
	Platform Super Admin	Manage users, mosques, admins, platform settings, reports, moderation, inactivity flags, account suspension
	Wali / Family Representative	Can be looped in by either party during a match, supports family discussions if requested
Registration & Onboarding	Account Registration	Register using basic personal details
	Gender Selection	Select whether registering as a male or female user
	Mosque Affiliation & Verification	User must select a specific mosque and be verified as affiliated with it by that mosque's admin before the profile can be approved; unverified profiles remain inactive
	Terms Acceptance	Accept platform terms, privacy policy, and community guidelines

	Marriage Purpose Confirmation	Confirm registration is for the purpose of marriage
Marriage Profile Creation	Basic Information	Name or display name, gender, age, marital status, nationality, ethnicity
	Location	Country, city, area, verified mosque
	Physical Details	Height and general appearance, described in text only
	Education and Career	Education level, profession, employment status
	Religious Information	Religious practice level, sect or school of thought if applicable, languages spoken
	Family Background	Family origin, family values, household background
	Marriage Preferences	Preferred spouse criteria, willingness to relocate, expected marriage timeline
	Personal Introduction	Short personal bio
	Wali / Guardian Details	Name, relationship, contact details, approval preferences
	Profile Status	Draft, submitted for review, mosque-verified, approved, rejected, inactive
	Draft & Resubmission	Profiles can be saved as drafts and resubmitted after rejection
Privacy & Contact Sharing	Contact Details Hidden by Default	Phone number and email are hidden until both users consent to share
	Contact Sharing Consent	Each user confirms via an explicit consent action, for example, "I allow the platform to share my contact details with this user"; contact details are exchanged only once both sides have consented
	Female Privacy Controls	Female users control which profile details are visible publicly versus to mosque admins only
	Profile Visibility	Only mosque-verified and approved profiles can be viewed by other users
	Profile Deactivation	Users can hide, pause, or deactivate their profile
Mosque Oversight	Affiliation Verification	Mosque admin confirms or rejects a user's claimed affiliation with that mosque at registration
	Request and Match Notification	Mosque admin is notified when a request is submitted, becomes an active match, or is closed
	View-Only Access	Mosque admin sees request and match status linked to their mosque but cannot approve, reject, or block a request itself
	Escalation on Request	Either user, or a wali, can pull the mosque admin into a conversation for guidance
	Conduct Flagging	Mosque admin can report a profile for inappropriate conduct, separate from the request

		itself
	Confidentiality	Mosque admin maintains confidentiality of match outcomes
Profile Search & Matching	Search Filters	Age range, location, nationality, education, marital status, religious preference, language, relocation preference, mosque, profession, family background
Interest Request & Match Workflow	Direct Interest Request	A male or female user submits an interest request directly to another user's profile
	Mosque Notification on Request	Mosque admin linked to either profile is notified automatically when a request is submitted, accepted, or closed
	Request Contents	Requesting user's profile, target profile reference, mosque details, optional message, request date, status
	Match Exclusivity Check	System blocks a new request if either user already has an active match
	Request Statuses	Submitted, Active Match, Awaiting Feedback (Female), Awaiting Feedback (Male), Closed (Mutual Agreement), Closed (Declined), Cancelled
	Match Closure	A match closes only once feedback has been submitted by both the female user and the male user
Contact Sharing After Match	Consent-Based Exchange	Once a match is active and both users separately confirm consent, the platform shares each user's contact details, phone number and/or email, with the other
	Mosque Not Copied on Exchange	Mosque admin is notified that a match is active but does not receive the shared contact details or message content
Account Activity Management	Inactivity Threshold	An account with no login or activity for 6 months is automatically flagged
	Admin Review	Platform Super Admin reviews flagged accounts
	Account Suspension	Super Admin can suspend or block a flagged account after review
Platform Super Admin Features	User & Profile Management	View, approve, suspend, or deactivate users; review, approve, reject, or edit profiles
	Mosque & Mosque Admin Management	Approve mosques and manage mosque and mosque-admin records
	Request Monitoring	View and track all interest requests and matches across mosques; handle reported profiles
	Platform Settings	Manage profile fields, privacy rules, and workflow settings

	Reports & Analytics	Total, male, and female users; active and inactive profiles; requests by status; successful matches; mosque and admin activity; mosque verification turnaround
Compliance & Privacy	Terms, Privacy Policy & Consent	Users agree to platform rules, understand data use, and consent to contact sharing under the defined workflow
	Data Visibility Rules	Users know who can view their information and when contact details are shared
	Account Deactivation & Data Deletion	Users can deactivate their account or request deletion of their data
	Sensitive Data Protection	Contact details are protected until mutual consent is given
	Mosque Access Rules	Mosques access only profiles, requests, and match status linked to them, and never receive shared contact details

3. End-to-End Application Workflow

Phase	Actor	Action
Phase 1 - Registration	Male / Female User	Visits the platform, selects gender, and registers with basic personal details
	System	Sends email and, if required, phone verification; user verifies both
	Male / Female User	Selects a specific mosque, accepts terms, privacy policy, and community guidelines, and confirms the marriage purpose of registration
Phase 2 - Mosque Affiliation Verification	Male / Female User	Submits mosque affiliation claim as part of registration
	Mosque Admin	Reviews the affiliation claim and confirms or rejects it
	System	Notifies the user of verification outcome; profile remains inactive until verified
Phase 3 - Marriage Profile Creation & Approval	Male / Female User	Completes profile sections: basic information, location, education and career, religious information, family background, marriage preferences, personal introduction, and wali/guardian details
	Female User	Sets privacy preferences: which fields are public and which are mosque-admin-only
	Male / Female User	Saves the profile as a draft or submits it for review
	Mosque Admin / Super Admin	Reviews the submitted profile for completeness and appropriateness

	Mosque Admin / Super Admin	Approves or rejects the profile, recording a reason if rejected; approved profiles become visible per privacy settings, rejected profiles can be edited and resubmitted
	System	Notifies the user of the approval or rejection outcome
Phase 4 - Search & Discovery	Male / Female User	Browses or searches approved, mosque-verified profiles using filters such as age, location, nationality, education, marital status, religious preference, language, relocation, mosque, or profession
	System	Displays only approved and verified profiles, respecting each user's privacy settings; contact details remain hidden throughout
	Male / Female User	Shortlists a profile of interest
Phase 5 - Interest Request & Match Initiation	Male / Female User	Submits an interest request directly to the shortlisted user's profile, optionally including a short message
	System	Checks match exclusivity; blocks the request if either user already has an active match
	System	Records the request and notifies the target user directly
	System	Notifies the mosque admin linked to either profile that a request has been submitted
	Target User	Accepts or declines the request
Phase 6 - Active Match	System	On acceptance, sets both users' status to Active Match and locks each user out of initiating or receiving further requests
	System	Notifies the mosque admin linked to either profile that a match is now active
	Male / Female User	Proceeds with getting to know each other within the terms of the platform; may loop in a wali or escalate to the mosque admin if guidance is needed
	Mosque Admin	Retains view-only visibility into the match status; can be escalated to but cannot close or block the match
Phase 7 - Contact Sharing	Male User	Confirms consent to share contact details with the matched user
	Female User	Confirms consent to share contact details with the matched user
	System	Once both consents are recorded, shares each user's contact details, phone number and/or email, with the other
	System	Notifies the mosque admin that a match is active; does not share contact details or message content with the mosque admin
Phase 8 - Match Closure	Female User	Submits feedback on the match outcome

	Male User	Submits feedback on the match outcome
	System	Closes the match only once both feedback submissions are received; status set to Closed (Mutual Agreement) or Closed (Declined), depending on outcome
	System	Unlocks both users to initiate or receive new interest requests once the match is closed
	Mosque Admin	Notified of match closure; outcome details remain confidential
Phase 9 - Account Activity Monitoring	System	Flags any account with no login or activity for 6 months
	Platform Super Admin	Reviews flagged accounts
	Platform Super Admin	Suspends or blocks the account if warranted after review
Phase 10 - Platform Oversight	Platform Super Admin	Continuously monitors all requests and matches across mosques, moderates reported profiles, manages mosque and admin accounts, and reviews platform-wide reports and analytics including total users, active profiles, requests by status, mosque and admin activity, and verification turnaround

4. Technology Stack

Layer	Choice
Frontend	React 18, TypeScript, Vite
Styling / UI	Tailwind CSS, shadcn/ui
Forms & Validation	React Hook Form, Zod
Backend & Database	Supabase, Postgres
Access Control	Postgres Row Level Security, per-field visibility, mosque-level scoping, hidden contact details
Auth	Supabase Auth with custom role claims: male/female user, mosque admin, super admin
Server Logic	Supabase Edge Functions for request routing, status transitions, and notifications
File Storage	Supabase Storage with private buckets and signed URLs for gated photo access
Hosting	Vercel for frontend, Supabase for backend
